GUANO No. 1. HAVE engaged in the Manipulation of GU-ANOS, and am now ready to supply the Farmers and Planters of the United States with an article which I consider superior to anything of the kind which has yet been produced, having an unusual amount I believe, of the valuable ingredients in this article. During my editorship of the American Farmer," with which until within a few months, I have been connected for 25 years, I have ost emphatically urged upon the Farmers and Planters that the mixture of the Ammoniacal Gu-ino (Peruvian) with the Phosphatic (Mexican, Columbian, &c..) was the best and cheapest application to most crops they could apply. For more general views upon this subject, I refer to the pages of the American Farmer; and also, to my cir ular just issued (and which will be forwarded to any one desiring it) in which this view is ably sus tained by Dr. Bickell, Analytical Chemist, of thi

THE EXCELSIOR MANIPULATED GUANO WILL BE PUT UP IN BAGS AND MARKED S. Sands' Excelsior Manipulated Guano,

AND WILL CONTAIN 91 to 10 per cent. Ammonia and 45 to 50 per cent. Phosphates.

It is intended that it shall reach the highest o these standards, but some allowance is desired to be made, to meet any possible short-coming which by accident may be made. The Excelsior No. 1 I believe equal to the best Peruvian Guano on any crop to which that article is applied, and will sur-pass it as improvement to land. The Agricultural oublic have been much imposed upon by all sorts of professed fertilizers, but I have no hesitation in saying, that I believe this compound will be found the "Ne Plus Ultra" of anything of the kind which has yet been produced; and with this confidence in its value, I have agreed to introduce it to the SAMUEL SANDS.
